**Ultra Electronics Card Systems** is one of the pioneers of ID card printing, having manufactured card printers since 1993. We differentiate ourselves by providing a quality product with enhanced card security features, and by providing the best support and warranty in the business.

Ultra Electronics Card Systems is part of the international aerospace, defence and security group, Ultra Electronics Holdings plc. With 3,400 employees, located mainly across the UK and North America, Ultra Electronics concentrates on obtaining a technology edge in niche markets, with many of our products and technologies being market leaders in their field.

MAGICARD®
Secure ID card printers

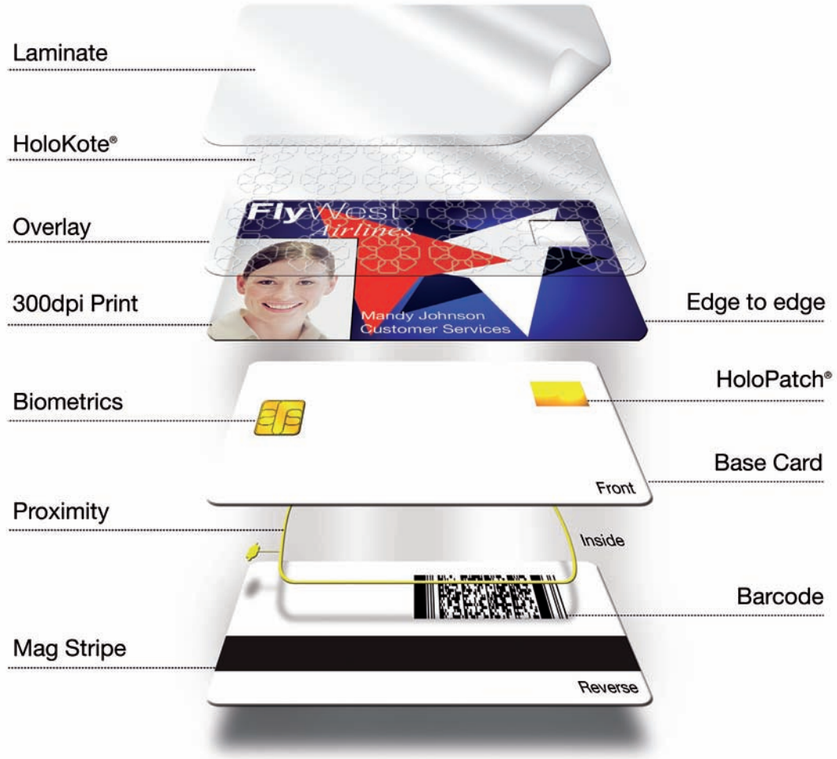
# MAGICARD Secure ID Card Printers

Whatever your needs for plastic card printing, our wide range of Magicard color card printers offers you the very best in image quality, security, and innovation for all your card printing solutions.

## It's all about the card...

ID or Identity cards, as their name implies, are used to identify individuals. Common applications include company ID cards, access control cards, membership cards, retail loyalty cards and government cards like driving licences.

ID cards are different from many other types of cards we use, such as credit cards, because ID cards are personalized to individual and organizational needs. Personalization means photos on the card, people's names, organization names, but can also extend into signatures, barcodes, and other forms of identification. Many cards these days also have electronic means of identification, such as embedded chips and magnetic stripe.



## How HoloKote® is printed onto the card.

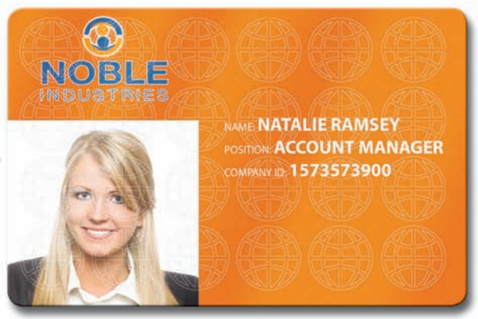
Color cards are printed using a thermal transfer YMCKO dye film. After the color image has been printed onto the card, the clear "O" panel is applied to protect the image from fading or scratching. MAGICARD's thermal transfer printer models have a unique facility called HoloKote for frosting a security image into the clear overcoat during the print process. This is a patented feature and unlike most other security logos, it involves no extra cost of printing.

## How do HoloKote® and HoloPatch® work together as a visible security feature?

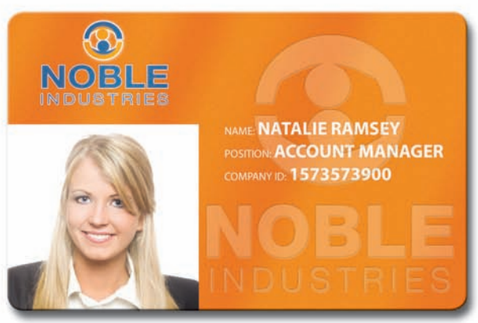
The unique HoloKote feature is daylight visible by tilting the card to view the watermark pattern.
For even greater security, HoloPatch cards combined with HoloKote provide a distance-visible security mark allowing a security guard or colleague to easily verify badge authenticity from a distance of six feet or more. It's the ultimate in card security simplicity.

**No Security** - CLEAR OVERCOAT

**Security** - STANDARD (Globes) HOLOKOTE



**High Security** - CUSTOM HOLOKOTE FLEX



**Added Visibility** - CUSTOM HOLOKOTE with HOLOPATCH

The built-in HoloKote watermark is a user option controlled by driver settings.
Custom HoloKote watermarks are ordered separately.

# Printer features.

## HoloKote®
The Ultra patented built-in HoloKote security watermark comes free with every Pronto, Enduro, Rio 2e, Tango 2e and Tango +L printer.

## HoloPatch®
Completely unique to Magicard, HoloPatch cards have a highly reflective gold 'super diffuser' seal. When used in conjunction with the HoloKote anti-counterfeiting feature, the security mark is highlighted for distance visibility.

## HoloKote FLEX™
A fully flexible and custom anti-counterfeiting watermark printed across the entire card surface. Custom security for your cards only.

## Edge-to-Edge
Edge-to-edge full color printing produces a high quality 300dpi image right to the edge of the card.
Available on all Magicard printers.

# Card encoding.

Card encoding allows electronic data on the card to be written to at the same time as printing a card. Magicard ID card printers support a wide range of card encoding in the printer:

- Magnetic stripe cards.
  All printers can be specified with ISO standard 7811 compatible HiCo encoding of magnetic stripe cards
- Contact smart card.
- Contactless smart cards (proximity card).

## Mag stripe
A dual coercivity HiCo/LoCo mag stripe encoder option which offers encoding of all three tracks with complete user format flexibility.

## Contact chip encoding
Optional ISO7816 internal smart card chip encoding contact station can be combined with the Mag stripe Encoder option (Specify /MS).

## Contactless encoding
Rio 2e, Tango 2e, Tango +L & Prima 3.
Various contactless smart card options available

# The best warranty and support in the industry - UltraCoverPlus is our promise to keep you printing.

UltraCoverPlus is your three year unlimited warranty package included with our professional range of card printers. Direct technical support, replacement printheads, and even a loan printer are provided FREE in the event a customer's machine requires depot service.

*Available in the EU, North America and other selected countries.

Pronto™

## Hand-fed ID Card Printer: Simply the best value color ID card printer.

A quality dye-sublimation ID card printer at a great price. Incredibly easy to use with drop-in dye film and hand-fed card loading.

**PRINTER** •Single-sided hand-fed printer

**SECURITY** •HoloKote card forgery protection
•4 fixed standard HoloKote patterns
•Prints on HoloPatch cards

**ENCODING** •Magstripe (optional)

## Pronto Specifications

BADGING SERIES

### Printing

| | |
|---|---|
| **Print Technology** | Dye sublimation. |
| **Print Speed** | 35 seconds color, 7 seconds monochrome. |
| **Card Thickness** | 20 mil to 40 mil. |
| **Card Capacity** | Hand fed - 1 card at a time. |

### Consumables

| | |
|---|---|
| **Dye Film** | **-MA300YMCKO** : 300 image YMCKO dye film.<br>**-MA600KO** : 600 image black resin dye film with overcoat.<br>**-MA1000K** : 1000 image black resin dye film. (various colors available) |
| **Laminates** | N/A. |
| **Cards** | -All standard PVC ISO CR80 cards. HiCo mag stripe and HoloPatch available. |

### Security (Use driver settings to activate HoloKote).

| | |
|---|---|
| **Security watermark** | Standard HoloKote® (4 standard designs). |
| **Gold seal** | HoloPatch® cardstock – ordered separately. |

### Encoding (Please specify when ordering)

| | |
|---|---|
| **Magnetic stripe** | HiCo and LoCo encoder ISO std. 7811 (Optional). |
| **Smartcard encoder** | N/A. |
| **Prox. card (contactless)** | N/A. |

### Printer

| | |
|---|---|
| **Printer interface** | USB rev.1.1 (USB 2.0 compatible). |
| **Drivers/software** | Windows 2000™, 2003™, XP™ and Vista™. |
| **Dimensions** | **Pronto (Part No: 3649-0001), Pronto MAG (Part No: 3649-0002):** 8.4" W x 9.1" H x 10.6" D. |
| **Warranty** | 2 years limited warranty (EU and North America), Elsewhere 12 months limited warranty. |

BADGING SERIES

Enduro™

## The single to dual-sided upgradable printer for plastic cards.

The Magicard Enduro printer can be ordered single or double-sided. For added flexibility, a simple drop-in upgrade is available for customers whose needs change from single-side cards to double-side cards in the future.

**PRINTER** •Specify single or double-sided as required (Option for double-side upgrade may be ordered later)

**SECURITY** •HoloKote card forgery protection
•4 fixed standard HoloKote patterns
•Prints on HoloPatch cards

**ENCODING** •Magstripe (optional)

| **Warranty** | 2 years limited warranty (EU and North America), Elsewhere 12 months limited warranty. |

**Operating Environment :** Sheltered office environment 50° F to 85° F **Safety :** CE certified - UL listed (USA & Canada)

# Rio 2e

## Single-sided ID Card Printer.

The high security Rio 2e prints top quality images and offers customers an option for fully customizable HoloKote watermark protection. This 3rd generation model is the preferred printer for secure access control single-side cards. **Now with Ethernet**

| | |
|---|---|
| PRINTER | •Single-sided secure printer |
| SECURITY | •HoloKote card forgery protection<br>•Custom security logos and text<br>•Prints on HoloPatch cards |
| ENCODING | •Magstripe/Proximity/Contact chip (optional) |

# Tango 2e

## Double-sided ID Card Printer.

High-throughput and high security. The robust double-sided Tango 2e prints top quality images and offers customers an option for fully customizable HoloKote watermark protection. This 3rd generation model is the preferred printer for secure access control double-sided cards. **Now with Ethernet**

| | |
|---|---|
| PRINTER | •Double-sided secure printer |
| SECURITY | •HoloKote card forgery protection<br>•Custom security logos and text<br>•Prints on HoloPatch cards |
| ENCODING | •Magstripe/Proximity/Contact chip (optional) |

# Tango +L

## Combined printer and laminator.

The Tango +L is a printer and integrated laminator. Based on the proven Tango print engine, and with a new design laminator, the Tango +L is the best choice for reliable, secure production of both single and double-sided laminated cards. Standard or custom HoloKote or Holograms combined with lamination, provide long life secure cards and extra durability when required.

| | |
|---|---|
| PRINTER | •Double-sided secure printer and laminator |
| SECURITY | •Standard and Custom HoloKote / holograms<br>•Prints on HoloPatch cards |
| ENCODING | •Magstripe/Proximity/Contact chip (optional) |

# Prima 3

## Reverse-transfer laminating printer.

The Prima 3 uses a printing technology called reverse-transfer. Images are printed onto a thin retransfer film and heat transferred onto the card. The quality of the finished card is comparable to off-set litho printing, but with the advantage that every card can be different.

| | |
|---|---|
| PRINTER | •Single-sided or double-sided |
| SECURITY | •Standard and Custom holograms |
| ENCODING | •Magstripe/Proximity/Contact chip (optional) |

# Rio 2e Specifications

## Printing

| | |
|---|---|
| **Print Technology** | Dye sublimation. |
| **Print Speed** | Color 22 seconds, 6 seconds monochrome. |
| **Card Thickness** | 20mil to 63mil. |
| **Card Capacity** | 100 card feed hopper, 50 card output stacker. |

## Consumables

| | |
|---|---|
| **Dye Film** | -**LC1** : 350 image YMCKO dye film.<br>-**LC3** : 1000 image monochrome resin dye film (range of colors).<br>-**LC6** : 600 image KO dye film, (black resin and overcoat). |
| **Laminates** | N/A. |
| **Cards** | -All standard PVC ISO CR80 cards. HiCo mag stripe and HoloPatch available. |

## Security (Use driver settings to activate HoloKote)

| | |
|---|---|
| **Security watermark** | Standard or custom HoloKote®. |
| **Gold seal** | HoloPatch® cardstock – ordered separately. |
