

# Open Notification

## Wireless Theft Notification System

The ON Alert Self-Storage unit theft prevention system is the latest in personal asset protection from PureRFid Inc. Through innovative technology you can be alerted to unauthorized attempts at entering your Self-Storage unit or other specified property at a moments notice.

With the easy to use clip-on door tag in place and your ON Alert system operating, theft prevention is as easy as 1-2-3.

1. When your storage unit is opened the tag sensor is activated.
2. The tag transmits a wireless signal to the ON Alert reader indicating an "Open" status.
3. The ON Alert reader notifies you by text message (SMS) that your storage unit door has been opened.

## Is your storage unit safe?

Recent headlines prove that it is no longer enough to just secure your storage unit with locks and bolts:

- 21 Self-Storage Units Robbed in South Carolina
- Police Investigate Break-In at Sioux Falls Self-Storage Facility
- Texas Saf-T-Loc Self-Storage Reports Break-In
- Police Investigate Break-In at Buffalo, N.Y., Self-Storage Facility
- Man Arrested for Possible Theft at Wichita Falls Self-Storage Site
- Man Suspected for Six Self-Storage Break-Ins in South Carolina
- Self-Storage Unit Break-Ins on the Rise

With ON Alert you can avoid going from this

To **THIS**, in between visits to your storage unit
